2002	77%	94%		100%		
2001	91%	98%		92%		
<p><u>Explanation of Data:</u> This data reflects the percentage of students who passed their licensure exam on the first attempt and is broken down by each allied health program. The percentage is supplied by the respective program coordinators. Please note that some graduates do not test in the year after graduation and therefore it is possible that the percentages in this table can change if they test later and pass.</p>
