**INSTITUTIONAL RESEARCH
EMPLOYEE SATISFACTION WITH AD HOC DATA/SURVEY REQUESTS SURVEY
RESULTS SUMMARY – FALL 2014**

HCTC employees who submitted either an ad hoc data request or survey request from June-December 2014 were asked to complete an 11-question satisfaction survey. (Data or surveys requests completed in June would normally be included the spring survey administration, but was not this time due to the fact that the 2013-14 Assessment Plans needed to be completed by the first week in June this year.) A copy of the survey instrument is attached to this report. A new question was added to the survey for Fall 2014, "The Office of Institutional Research seeks opportunities to improve institutional effectiveness." Seven questions asked for a level of agreement, one question was demographic, two questions related to the type of request, and a final open-ended question asked for comments.

According to the data request/survey request logs, the Coordinator of Institutional Research completed a total of 199 data requests and 32 survey requests (includes both the survey setup and the results report) from June-December 2014 compared to 98 data requests and 32 surveys in Spring 2014 for January-May 2014. The survey link was sent via email at the end of June-December only to those employees who requested data or survey assistance during each particular month. A total of 25 responses were collected for the survey during the time period compared to 29 responses received in Spring 2014, 32 responses received in Fall 2013, 45 responses received in Spring 2013, 44 responses received in Fall 2012, 53 responses received in Spring 2012, 21 responses received in Fall 2011, 53 responses received in Spring 2011, 15 responses received in Fall 2010, and 15 responses received in Spring 2010.

Please see the attached Survey Results report for the specific totals and percentages. An attached Excel file contains the raw data which includes feedback for the open-ended question. Please see the following summary table. A summary statement concludes this report. The final page of this document provides the codebook for the raw data.
