UNMANNED SYSTEMS ● ● ● TECHNOLOGY

Classes begin September 16, 2019

The rapidly growing field of Unmanned Systems Technology (UST) enables students to gain knowledge and skills in advanced drone operator, first responder specialist, unmanned systems technician, and GIS/Unmanned Systems Specialist. This program prepares students for entry and advancement within the unmanned systems technology workforce (aerial, land, and water vehicles/robotics) field and to pilot unmanned aircrafts for private and commercial industries.

UST Degree Concentrations:

- Advance Drone Operator
- First Responder Specialist
- Unmanned Systems Technician
- GIS/Unmanned Systems Specialist

Four Certificates Available:

- Remote Drone Pilot (3 hours)
- Unmanned Systems Technology (19 hours)
- First Responder Specialist (24 hours)
- GIS/Unmanned Systems Specialist (21 hours)

Fall 2019 Classes:

- UST 100 Intro to Unmanned Systems Technology (3 credit hours)
- UST 105 Unmanned Systems Safety and Regulation (3 credit hours)
- UST 107 Commercial Drone Operations (3 credit hours and earn a certificate!)
- UST 221 Crew Resource Management (1 credit hour)
- HSM 110 Intro to Emergency Management (3 credit hours)
- GIS 145 Remote Sensing (3 credit hours)
