

Developmental Education Update

Spring 2018

Hello Everyone,

As we begin registration for Spring 2018, we wanted to provide you with an update on the exciting changes for the schedule. Developmental Education Instructors are continuing our attempts to move students through their developmental coursework more quickly. We are continuing to offer a variety of formats including Emporium Model, traditional in-class, online classes, and co-requisite (co-req) course pairings. The co-req model courses allow students to enroll in a class one level above the class they tested into (paired with a class that includes supplemental instruction). We will also be offering courses that will help students meet their reading and writing needs in one course.

Hazard Campus Math Course Offerings:

Students who test into MAT 55 and have a Pre-Algebra score of 31 should go into the MAT 65/MAT 50 co-requisite course pairings. This will allow MAT 55 students to move more quickly through the developmental math sequence by “skipping” MAT 55 and getting the supplemental instruction needed to be successful in MAT 65 in the MAT 50 lab course. Students who test into MAT 55 with a minimum PA score of 31 or Wonderlic Quantitative score of 225 should be enrolled in these paired courses. Students will need permission to enroll since faculty will see a prompt that the student has not met prerequisite MAT 55 course.

Students with a PA score below 31 or Wonderlic Quantitative score of 225 need to be enrolled in a regular MAT 055 course.

Students who place into MAT 065 can also be registered in these sections without enrolling in MAT 50, since they have met the prerequisite.

The following course is for students who test into MAT 85 or who complete MAT 65. This course is MAT 150 enhanced with supplemental instruction in a special section of MAT 96 paired specifically with the MAT 150 course. It will allow MAT 85 students or students who complete MAT 65 to move more quickly through the developmental math sequence by “skipping” MAT 85 and getting the supplemental instruction needed to be successful in MAT 150 through the MAT 96 course. Only students who test into MAT 85 or students who complete MAT 65 should be enrolled in this course. No more than half of the students in the MAT 150 course should be true MAT 150 students.

Students who need the complete pairing (students who test into MAT 85 or who complete MAT 65) must be enrolled in both MAT 150 45P1 and MAT 096 45P1. Students who only need MAT 150 can register, but they will need instructor approval or will need to contact the Records Office to join this course.

Students who are skipping MAT 085 must be enrolled in the PAIRED sections.

Lees College Campus:

The following course is for students who test into MAT 85 or who complete MAT 65. This course is MAT 150 enhanced with supplemental instruction in a special section of MAT 100 paired specifically with the MAT 150 course. It will allow MAT 85 students or students who complete MAT 65 to move more quickly through the developmental math sequence by “skipping” MAT 85 and getting the supplemental instruction needed to be successful in MAT 150 through the MAT 100 course. Only students who test into MAT 85 or students who complete MAT 65 should be enrolled in this course. No more than half of the students in the MAT 150 course should be true MAT 150 students.

Students who need the complete pairing (students who test into MAT 85 or who complete MAT 65) must be enrolled in both MAT 150 47P1 and MAT 100 47P1. Students who only need MAT 150 can register, but they will need instructor approval or will need to contact the Records Office to join this course.

Students who are skipping MAT 085 must be enrolled in the PAIRED sections.

Knott County Branch:

The following course is for students who test into MAT 85 or who complete MAT 65. This course is MAT 150 enhanced with supplemental instruction in a special section of MAT 96 paired specifically with the MAT 150 course. It will allow MAT 85 students or students who complete MAT 65 to move more quickly through the developmental math sequence by “skipping” MAT 85 and getting the supplemental instruction needed to be successful in MAT 150 through the MAT 96 course. Only students who test into MAT 85 or students who complete MAT 65 should be enrolled in this course. No more than half of the students in the MAT 150 course should be true MAT 150 students.

Students who need the complete pairing (students who test into MAT 85 or who complete MAT 65) must be enrolled in both MAT 150 46P1 and MAT 096 46P1. Students who only need MAT 150 can register, but they will need instructor approval or will need to contact the Records Office to join this course.

Students who are skipping MAT 085 must be enrolled in the PAIRED sections.

Reading/Writing Course Offerings:

If students test in to developmental reading, writing, or both, please enroll them in IRW 95. Students who test into only RDG or ENC will benefit from the focus on both disciplines, which are so closely related. Students who need both RDG and ENC will save two credits by taking this one four-credit class, and they will complete both their reading and writing requirements in this course. **For in-person options, the IRW 95 will be the best option.**

For students who cannot take an in-person option, they can take ENC 91, RDG 20, and RDG 30 online.
