Suggestions for excellent advising

- **Placement scores are not a suggestion. If you feel that placement needs to somehow be different than what the score indicates, either contact the program faculty who have the professional experience and judgement to make a recommendation, or better yet, have them retest.**
- **Never place MAT 100 students in the paired MAT 100 without the paired MAT 150. The pairing is tailor made to work together so the MAT 100 is ineffective with other sections of MAT 150**
- **Place students who test into MAT 150 without workshop into any section of MAT 150, paired or unpaired.**
- **Students who test into MAT 150 with the workshop may take the MAT 100 sections which are stacked with the developmental sections if they are not in the paired MAT 150**
- **Students completing MAT 085 do not have to take MAT 150 with the workshop, but feel free to offer the workshop to them.**
- **If a student feels that they placed too low by placing into MAT 055, they can work ahead and complete both MAT 055 and 065 in one semester if they are correct in their beliefs.**
